

Flexible Hoses & Ripple Tubes

Hallmark Industries range of stainless steel braided flexible hoses are well established in plumbing industries and recent improvements have seen the range become Watermark certified.

These hoses have a full bore inner tube, allowing superior flow rates. The EPDM tube also provides safe operation in both hot and cold water applications.

Flexible hoses are available in 100mm – 600m lengths, with and without elbows.

Hallmark Industries Ripple Tubes are made from Stainless Steel 304 with Connection BSP screw thread. The working temperature is 0°C to 120°C and working pressure 1.6 MPa. The products can be used for Water, Gas and Steam.

See Hallmark Industries selection of flexible hoses and ripple tubes below.

Image	Order Code	Description	Size(mm)	Std Pk Qty
STAINLESS STEEL RIPPLE TUBES				
	H-RT15/300		15/300mm	10
	H-RT15/400		15/400mm	10
	H-RT15/500		15/500mm	10
	H-RT15/600		15/600mm	10
	H-RT20/200		20/200mm	10
	H-RT20/300		20/300mm	10
	H-RT20/400		20/400mm	10
	H-RT20/500		20/500mm	10
	H-RT20/600		20/600mm	10
